Dear Miss[redacted]

Following my email from last Friday I would like to reach out to you with a sincere request to inform me if the actions I took (together with the person who rents the apartment, Mr[redacted] and informed you about in the last email, are sufficient to remove the dwangsom of 50.000 euro? This situation is extremely stressful for me, I can't sleep at night because of it. I have been informed in a Juridisch Loket that in order to do so Mr[redacted] without any doubt from your site must live there, his private space must be at least 60% of the apartment. And if this is met than he can rent the remaining one bedroom to tourists as a legal B&B registered in KVK. I don't understand the articles cause those are complicated and my Dutch language is pretty poor, this is the reason why I went for advice to Juridisch Loket and hope that the advice I received is correct, but like I said I am not a lawyer and this subject is very complicated for me.
Please let me know if I am still missing something which might result in me having to pay this huge amount or what I have done is sufficient.

I greatly appreciate your help.
