Dear [redacted]

Just wrapping up on this, but wanted to run a couple of things past you

On the news pages, two of the stories refer to figures from 2017, which are too old to run in 2019.

I've dropped one and replaced it with something from earlier this year about investments in care Vastgoed in the Netherlands, with figures about the size of investments.

I've also updated the Ollongren item with the new stuff from the link you sent me - the agreement with the four big cities on working with national government.

I suggest we leave the Eindhoven item in, because after all, that will be new at Mipim. I can change it of course, if we have another item I can use to fill the gap.

I just checked the Holland Metropole website to see if there is anything interesting to add... nothing there but this text in English is terrible and needs editing!

[redacted]

We're looking forward to meeting you at our Holland Metropole stand, where all our partners individually and together propose several investment opportunities to you in all real estate segments. Small and large scale, new mixed use development as well as transformation of vacant buildings.

Please visit us and discover for yourself a market with quality, scale and sustainability!
