BOEREJONGENS COFFEESHOP
Our mission
What makes us
The Best Amsterdam Coffeeshop.
When we, the Boerejongens, are asked about our success. We like to make the comparison between a restaurant and that with a Michelin Star. While both strive for superior quality, one is obviously better at it than the other.
The differences between 'quality' and 'top quality' are spread throughout the business.
Top quality products
Our product knowledge & customer service
The growing diversity of our products
The quality of our shops and dispensaries
The ambiance
The price to quality ratio
Host in a three-piece suit and matching bowler hat
Stylish interior that radiates what we do and stand for. Great class
To provide the best price to quality ratio while constantly setting out to set new standards. The key behind the success of Boerejongens is the trust in our product from our customers.
What makes our products so special?
We listen to what our customers are looking for and use this knowledge to further

BOEREJONGENS COFFEESHOP

Community

Boerejongens Coffeeshops, part of our local community

Boerejongens Coffeeshops are really part of the local community. We help contribute to a better local neighbourhood by means of De Buurtgastheren.

De Buurtgastheren protect the social cohesion and safety around our shops. They also help add to the social spirit of the community.

De Buurtgastheren help, correct and check (ID 18+). They give you a friendly welcome and always strife to cohesion and harmony. This way a good ambiance is achieved for everyone.

De Buurtgastheren

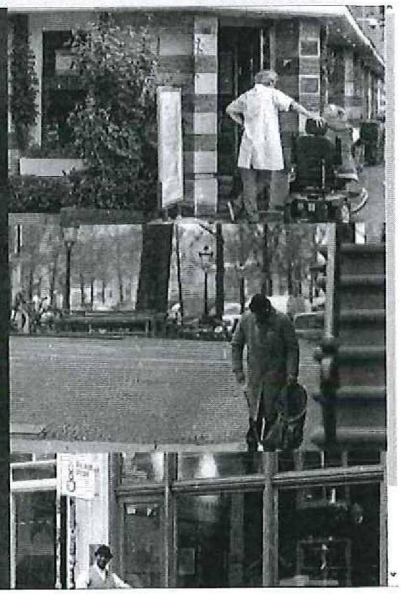
As part of our working partnership with De Buurtgastheren we try to provide help where we can to the local neighbourhood.

If one of our neighbours need help with her groceries? Then we'll collect them. Cleaning the porch for the neighbour? No problem! Need to borrow a bicycle pump? We've got one for you.

The Boerejongens has also adopted 6 of the underground garbage containers from the municipality Amsterdam, which are cared for greatly each day.

De Baarsjes

De Baarsjes is developing excellently as a local community. Along the entire Baarsjesweg more and more companies are starting to settle. Over the last year the Baarsjes has changed beyond recognition. The zoning plan means the entire



BOEREJONGENS COFFEESHOP
Awareness
Raising your awareness of cannabis through education.
Boerejongens believe firmly in Cannabis Education. When Dutch legislation allows we aim to provide more information on all of our products. This would include giving customers a leaflet containing test results and a concise report on the strain they had purchased.
What is cannabis?
Marijuana is basically the dried flowering top from a cannabis plant while Hashish is made from compressed cannabis resin. Hashish and marijuana are drugs that suppress feelings and pain. Beware as they can also change the way you perceive things around. The chemical that produces these effects is called THC. Each different type of hashish or marijuana contains a different amount of THC as part of our increased customer awareness we now list this value on our coffeeshop menu
What are the risks of taking cannabis?
As part of Boerejongens policy to increase our customers awareness we would also like to point out the risks involved with taking cannabis in any form. Customers could experience trouble with thinking logically as well as remembering simple things like what just happened. Smoking cannabis releases tar into your lungs which could cause damage. It is also possible that it could hit you in the wrong leading to loss of control, feeling sick and increased fear. Cannabis should always be used responsibly. Constant use can lead to addiction both psychologically and physically
What are the effects of taking cannabis?
Depending on the way you prefer to enjoy our quality products will depend when the effects will start. Customers who prefer to smoke will notice the effect after a few minutes and it could last anywhere between two and four hours. If you prefer to ingest our products in some way then be prepared for the effects not to take hold for up to an hour later. You should then expect to notice the effects for between four and eight hours
Cannabis test
Following the test will help you discover whether you are taking too many risks. Once you've answered the questions you'll receive the test results with information about your score. Depending on your score, we'll make certain recommendations
Further help and advice on curing cannabis can be found from the sites below
