Subject	Membership termination Amsterdam

Dear reader,

With this letter Amsterdam wants to terminate its membership of the EIT Urban Mobility Association. In 2018, Amsterdam and the other partners had ambitious plans with the Mobilus proposal that launched the EIT Urban Mobility. Amsterdam became a member of the EIT Urban Mobility Association in 2019. Unfortunately, the ambitions were never fully achieved.

Amsterdam is not convinced that the needed changes will be realized by the Association and will no longer be participating in EIT Urban Mobility activities. Membership of the Association requires the conviction that participation in EIT UM activities brings added value to the city of Amsterdam and that is no longer the case.

Thank you for all your efforts over the last five years and all the best with the EIT Urban Mobility and the Association. Amsterdam will remain active in European activities and remains open to new opportunities in the future, so I'm sure that our paths will cross again.

With kind regards,

Melanie van der Horst
Deputy mayor of Mobility and Public Space
