Subject: Centrum west traffic management
Categories: Gele categorie

Dear Gemeente,

Thank you for the opportunity to email you with our views on the proposed traffic management measures in Centrum West.

As long term residents 5.1,2,e on the Prinsengracht, we strongly support the plan proposed.

We support it for the following reasons:

- We believe the infrastructure of the centrum is inadequate to support the current road traffic
- We feel global restriction on private motor vehicles is essential for global ecology
- The heavy bicycle and foot traffic in centrum west makes vehicle traffic a danger.
- The inconvenience to residence from the plan is mild. We believe this burden should be accepted for the greater good of the community

Groeten

5.1,2,e and 5.1,2,e
