Dear City of Amsterdam,

Firstly, my apologies for the English im an expat from 5.1,2,e who is now an owner of a flat on the Brouwersgracht.

Thank you for your recent communication regarding proposed traffic management measures.

I would like to confirm my full support for both suggested measures.

Additionally, I would like to mention that I came across a previously performed investigation into restoring back some of Amsterdams filled in canals. The Palmgracht was seen as one of the more suitable candidates from the list, was curious if there was any interest in revisiting this initiative? This would also help with the traffic reduction, reduction of space for cars and improve the quality of life for the local residents, which I would also fully support.

My thanks in advance, and success with your proposed measures.
Kind regards,
5.1,2,e
