Hello

I live in the middle of the proposed traffic blockage plan for centrum-west. While I think it is lovely to have less traffic, I am concerned about restricting taxi access. I am in the middle of the restricted plan and it will take me 10 or 15 minutes to walk to somewhere where I can call a taxi, that is really going to be difficult as I do use taxi's to transport myself and heavy luggage and equipment. I won't be able to walk that far with it as it is so heavy and not easy to transport.

When my mother visits, she uses taxis to come to my apartment, she is old and can't walk that well. I fear she may not come to visit because of this.

I don't own a car, but I do rent cars regularly, 5.1,2,e would it be possible to use a rental car in this area?

Please can you tell me if there will be a solution for these concerns?

Thank you
