Uw reactie

- the locations is the worse one, specially now that they want to put it on the corner where where Cornelis Lelylaan and Meer en Vaart. meet and also were the major traffic jams take place in the neighbourhood

- A building on that lake will the view from the opposite side ugly, because now a building is on the beautiful lake on the sunset or sunrise

- the building should be located more into the west osdorp, that would make the neighbourhood more inclusive by not centralizing all nice thing in one area
