Hello 5.1, 2, e

As spoken on whatsapp the gym is gathering all the needed things to legalise their gym according tot he bestemmingsplan. For this the gym needs to do acoustical investigation, first to see what the current situation is, and after that they wil have to do another investigation to see what they need to improve to make sure the noise is being kept to an minimum according tot he regulations and a good living climate.

The research needs tob e done in the surrounding houses, so the reaserch is needed in three surrounding houses, as your house is situated right above the gym its needed for best results for the research. The idea is to suggest three dates in januari so the acoustic reasearch company can plan dates for it.

Let me know if u want and can cooperate with the investiagion. I know u stying for longer period not in holland, let me know if u can still manage with the investiation in januari, or u can cooperate when u are back, or u dont want to cooperate

Kind regards

Met vriendelijke groet,

Met vriendelijke groet,
