**Onderwerp:** Request for further information and potentially data regarding the Weesperstraat-Valkenburgerstraat trial

Hi Team at Amsterdam Municipality,

My name is 5.1.2.e I am a Senior Lecturer at the School of Civil and Environmental Engineering at the University of Technology Sydney (UTS). I, along with my colleague 5.1.2.e 5.1.2.e am conducting a research project concerning the application and evaluation of shared road infrastructure.

We believe the trial presented here:

<https://www.amsterdam.nl/projecten/weesperstraat-valkenburgerstraat/#he1c9656c-50fd-4c7c-b2eb-7ecd293b829a> is a fantastic example of a scheme that encourages better sharing of the available infrastructure and would really value to have a deeper insight into the project. **Would it be possible to get further information and potentially even some data so that we can conduct an analysis of the impacts?**

I am including a link to the work we are doing at UTS: <https://www.transport.nsw.gov.au/shared-spaces-in-nsw>. Our goal is to establish standards and guidance to streamline trials (like this one – especially in Australia) and also permanent implementations to make it easier for planners and engineers to implement and evaluate such changes to the road network.

Any help would be greatly appreciated, I am currently in Germany – so please do let me know if you are interested in and have time to do a video call.

Kind regards,

5.1.2.e

Senior Lecturer, School of Civil & Environmental Engineering

Joint Program Leader, Tactical Planning, Health monitoring and Safety of Transport Systems, Transport Research Centre (TRC)
