

5.1-2-b

A Gantt chart showing project tasks. The chart has a vertical axis on the left with grey bars representing task durations. Several tasks are highlighted with orange bars, indicating they are the focus of the calculation. The bars are arranged in a hierarchical structure, with some tasks branching into sub-tasks.

A large grid table with multiple columns and rows. The grid is mostly empty, with some faint lines and a few small grey cells, possibly representing data points or a calculation matrix. The grid is organized into several vertical sections.

A summary table with colored bars and numerical values. The table has a vertical axis on the left with grey bars. The bars are colored orange, green, and yellow. The table contains numerical values in the right column, which are likely the results of the calculations shown in the Gantt chart above.
