Page 6 of 9

- 2. ISO 5659 Plastics - Smoke Generation - Part 2 1994: Determination of Optical Density by a Single Chamber Test.
- 3. ISO/TR 9122 Toxicity Testing of Fire Effluents - Part 3: Methods for the Analysis of Gases and Vapours in Fire Effluents.

Validity

The specification and interpretation of fire test methods are the subject of ongoing development and refinement. Changes in associated legislation may also occur. For these reasons it is recommended that the relevance of test reports over five years old should be considered by the user. The laboratory that issued the report will be able to offer, on behalf of the legal owner, a review of the procedures adopted for a particular test to ensure that they are consistent with current practices, and if required may endorse the test report.

This report may only be reproduced in full. Extracts or abridgements shall not be published without permission of Warrington Fire Research Centre.
